

HAZARDS IDENTIFICATION

(ANSI Section 3)

Primary route(s) of exposure: Inhalation, skin contact, eye contact, ingestion.**Effects of overexposure:****Inhalation:** Irritation of respiratory tract. Prolonged inhalation may lead to chest pain, coughing, difficulty of breathing, severe lung irritation or damage, pneumoconiosis.**Skin contact:** Irritation of skin.**Eye contact:** Irritation of eyes.**Ingestion:** Ingestion may cause mouth and throat irritation, gastro-intestinal disturbances.**Medical conditions aggravated by exposure:** Eye, skin, respiratory disorders asthma-like conditions**FIRST-AID MEASURES**

(ANSI Section 4)

Inhalation: Remove to fresh air. Restore and support continued breathing. Get emergency medical attention. Have trained person give oxygen if necessary. Get medical help for any breathing difficulty. Remove to fresh air if inhalation causes eye watering, headaches, dizziness, or other discomfort.**Skin contact:** Wash thoroughly with soap and water. If any product remains, gently rub petroleum jelly, vegetable or mineral/baby oil onto skin. Repeated applications may be needed. Remove contaminated clothing. Wash contaminated clothing before re-use.**Eye contact:** Flush immediately with large amounts of water, especially under lids for at least 15 minutes. If irritation or other effects persist, obtain medical treatment.**Ingestion:** If swallowed, obtain medical treatment immediately.**FIRE-FIGHTING MEASURES**

(ANSI Section 5)

Fire extinguishing media: Dry chemical or foam closed containers may burst if exposed to extreme heat or fire.**Fire fighting procedures:** Water may be used to cool and protect exposed containers. Firefighters should use full protective clothing, eye protection, and self-contained breathing apparatus.**Hazardous decomposition or combustion products:** Carbon monoxide, carbon dioxide.**ACCIDENTAL RELEASE MEASURES**

(ANSI Section 6)

Steps to be taken in case material is released or spilled: Comply with all applicable health and environmental regulations. Ventilate area. Place collected material in proper container.**HANDLING AND STORAGE**

(ANSI Section 7)

Handling and storage: Store below 100°F (38°C). Keep from freezing.**Other precautions:** Use only with adequate ventilation. Do not take internally. Keep out of reach of children. Avoid contact with skin and eyes, and breathing of vapors. Wash hands thoroughly after handling, especially before eating or smoking. Keep containers tightly closed and upright when not in use. Avoid conditions which result in formation of inhalable particles such as spraying or abrading (sanding) painted surfaces. If such conditions cannot be avoided, use appropriate respiratory protection as directed under exposure controls/personal protection.**EXPOSURE CONTROLS/PERSONAL PROTECTION** (ANSI Section 8)**Respiratory protection:** Control environmental concentrations below applicable exposure standards when using this material. When respiratory protection is determined to be necessary, use a NIOSH/MSHA (Canadian 294.4) Approved elastomeric sealing-surface facepiece respirator outfitted with organic vapor cartridges and paint spray (dust/mist) prefilters. Determine the proper level of protection by conducting appropriate air monitoring. Consult 29CFR1910.134 For selection of respirators (Canadian 294.4).**Ventilation:** Provide dilution ventilation or local exhaust to prevent build-up of vapors.**Personal protective equipment:** Eye wash, safety shower, safety glasses or goggles. Impervious gloves, impervious clothing.**STABILITY AND REACTIVITY**

(ANSI Section 10)

Under normal conditions: Stable see section 5 fire fighting measures**Materials to avoid:** Oxidizers.**Conditions to avoid:** Freezing.**Hazardous polymerization:** Will not occur**TOXICOLOGICAL INFORMATION**

(ANSI Section 11)

Supplemental health information: No additional effects are anticipated**Carcinogenicity:** Inhalation of non-asbestiform cosmetic grade talc for 2 years at 6 and 18 mg/m³ produced clear evidence of carcinogenicity in female rats (lung and adrenal tumors) and some evidence of carcinogenicity in male rats (adrenal tumors). No evidence of carcinogenicity was demonstrated in male and female mice exposed under the same conditions. Microscopic examination of the lungs of rats and mice exposed to talc revealed additional exposure related effects primarily associated with the inflammatory response.**Reproductive effects:** No reproductive effects are anticipated**Mutagenicity:** No mutagenic effects are anticipated**Teratogenicity:** No teratogenic effects are anticipated**ECOLOGICAL INFORMATION**

(ANSI Section 12)

No ecological testing has been done by ICI paints on this product as a whole.

DISPOSAL CONSIDERATIONS

(ANSI Section 13)

Waste disposal: Dispose in accordance with all applicable regulations.**REGULATORY INFORMATION**

(ANSI Section 15)

As of the date of this MSDS, all of the components in this product are listed (or are otherwise exempt from listing) on the TSCA inventory. This product has been classified in accordance with the hazard criteria of the CFR (controlled products regulations) and the MSDS contains all the information required by the CFR.

The information contained herein is based on data available at the time of preparation of this data sheet which ICI Paints believes to be reliable. However, no warranty is expressed or implied regarding the accuracy of this data. ICI Paints shall not be responsible for the use of this information, or of any product, method or apparatus mentioned and you must make your own determination of its suitability and completeness for your own use, for the protection of the environment, and the health and safety of your employees and the users of this material.

Complies with OSHA hazard communication standard 29CFR1910.1200.
